CONDITION OF WINTER GRAIN.

An Advance of One Pelut During the Month of April-No State Average Less than Sinety-Three-Effect of the Frost. Small Fruit Damaged - Other Dispatches from the National Capital.

WASHINGTON, May 11.—The condition of winter grain on the 1st of May is reported by the statistician of the department of agriculture as follows: Wheat. 97.9, rye, 97.2: barley, 96.2. This is an advance in wheat of one point during April, and of quite as much in rve. A gain in wheat is reported in New York. in some of the southern states, in Michigan, and slight improvement in Illinois, Missouri and some other states. The uniformity of condition is somewhat remarkable, no state average being lower

than 93.

The condition of mowing lands is also ingle averaging 97, ranging from 90 to 100. The average for spring pasture is 98, ranging from 92 to 100, except a drop in Utah to 89, and in New Mexico to 83. The eastern slope of the Rocky mountains comes within four or five points of full condition, and the Pacific coast is near the maximum.

F. C. & M. W. Goodvear, of this city. The fire was discovered Sunday morning. Thirty million feet of timber and thirty miles of the railroad track. Telegraph and telephone service is hadly crippled, and it will be impossible to get details until to-morrow.

An investigation has been made of the effects of frost on the 5th and 6th of May. Telegrams have been received from state agents showing that very general damage has resulted to strawberries and early vegetables; some injury to grapes and cherries, and peaches to some

In the east and north it was too early to injure pears; in the Ohio valley it is thought it may cause dropping of growing truit. The fruit belt of western Michigan is said to have a western discharge in said to have a western to be the said ing fruit. The fruit best of western Michigan is said to have received little injury though the damage has been serious, especially to small fruits and vegetables in other parts of Michigan. Nearly all unite in saying that no injury to the growing crops has occurred.

A brisk wind and dry air favored the New Jersey orchards, and the loss of peaches and apples will not be so serious as was feared. The Maryland agent reports loss of strawberries and early vegetables, with no injury to grain and none to apples, peaches or plams, as mea-tioned. The damage to the reach belt is apparently not so serious as was at first

NEWS FROM ABROAD. Disputches Recording Important Hap-

penings in the Old World. LONDON. May 10 .- Thirty-eight suffrage meetings were held yesterday in Brussels and other cities in Belgium, and the attendance numbered of thousands the attendance numbered of thousands. Many of the speeches made were of the most violent character, the speakers urging that the working people must assert their right to a share in the government. The upper classes were warned that their oligarchy was approaching a close and nothing short of universal suffrage properly granted would be likely to avert a revolution.

A socialist orator in Brussels asserted that the day was not far distant when royalty would be brought down as it had been brought down by the French revolution, and that the bayonets em-

In Antwerp, Ghent, Liege and Charleroi, as well as Brussels, the garrisons rot, as well as Brussels, the garrisons were kept ready for instant service and the police were reinforced by gendarmes. The miners on a strike assembled as on May Day, but without any serious exhibition of violence. The utmost anxiety is felt by the authorities as to the future, and it is said that both line, and coling force annula concess. to the future, and it is said that both king and cabinet favor ample concessions on the suffrage issue as a means of placating the workingmen. The majority of parliament is, however, still stubbornly opposed to the surrender of the powers and privileges which the upper orders in Belgium have so long possessed exclusively, and the fartlest upper orders in Belgium have so long possessed exclusively, and the farthest they are wiling to go is to place the suffrage within reach of the lesser taxpayers, still excluding the vast majority of the workingmen. In England and Germany the situation is viewed with equal anxiety, as it is felt that the agitation is favorable to France and that the Socialist element would rise en masse in the event of a war in the event of a war.

SLAE statement of the Principal Requirements and Features of Oblo's

New Election Law. The new election law which was enacted by the legislature recently is the Australian system of voting, with a few changes, and is in most respects similar o the system adopted in nearly all of the northern states. It provides for a non-partisan state election board to be appointed by the governor and for nonpartisan county election boards to be appointed by the probate judge. This latter board is to consist of four members, and their pay is to be \$2 per day for not more than twenty days pyear. In counties where there are ities which already have legally constituted election boards the latter are not interfered with and the board apminted by the projecte judge will have jurisdiction only over that portion of

the county outside of such cities. The probate judge is required to unke his appointments on or before the first Monday in July. The county executive committee of each party has the right to name the members to represent that party if they choose to do and their recommendations are suit-

The county board is required to meet at least thirty days before the Novemher election of each year in the office of the county commissioners, and elect a president and clerk, the latter to be elected outside of the board. The clerk is to be paid a salary to be tixed by the board and not to exceed \$100 per year, and the members of the board to receive \$2 per day and not to exceed wenty days each year, and mileage at and returning from meeting. The board must also meet on the twelfth lay before any election.

The expenses of all general elections are to be paid from the county treasurv, but local elections from the municipal treasury.

The county board shall appoint nonpartisan election boards of four judges and two clerks for each precinct in the county and designate which one of the indges shall be presiding judge of the precinct. The judges and clerks shall serve one year. City councilmen and two township trustees having the shortest terms to serve will be appointed as two of the judges of election and the township clerk shall be one of the clerks of election in each township. It any vacancy exists at the opening of he polls, the electors then present fill such vacancy, but must preserve the equal division of the board between the two parties. Judges and clerks regeive \$1.50 for each election.

Section II permits two challengers to be present for each political party having candidates at the election, but they must take an oath that they will not tell how any elector voted at the

Section 12 perscribes the rules for naking nominations. All other nominations are to be certified to the county board not less than twelve days before election. Where there are city boards the nominations for city offices may be filed with such board eight days before election. If there is a dispute as to who is nominated, the secretary of state decides as to state nominations, the county board as to county nominations and the city board as to city neminations; and if the contest be as to district officers the question is decided by the presidents of the several county boards.
